Flexi

Manual & automated job nesting

Flexi's automated Job Nesting optimizes your device and media usage by grouping multiple print jobs into one job before printing. Take total control using Flexi's manual layout tool to quickly nest multiple print jobs or multiple pages, copies, tiles or separations of the same job.

True Shape Vinyl Cut Job nesting

Optimize your material usage even more when you use True Shape nesting to automatically fit objects together based on their actual shape.

Full vector design application

In FlexiSIGN-PRO HP Edition, you have all the vector design tools required for professional day-to-day signmaking at your fingertips. Increase your creativity and productivity with extremely intuitive layout and design tools such as bitmap vectorization, advanced point and curve editing tools, work with Smart Objects or parametric shapes, weld and merge several object together, create outlines, apply shadows, compose text, braille or barcodes, or apply variable data to your design – all from a single application.

No matter how complex your design, Flexi's powerful DesignEditor helps you manage the various layers and objects in your design and ensures each separate element remains editable, even when it's part of a group or effects have been applied to it.
