HP Integrated media library tool

Take full advantage of the newest HP Latex printer capabilities thanks to Flexi's close integration with HP's online Media Library. View types of media and auto-synchronize ICC profiles with Flexi to get up and running quickly.

Manual & automated job nesting

Flexi's automated Job Nesting optimizes your device and media usage by grouping multiple print jobs into one job before printing. Take control using Flexi's manual layout tool to quickly nest multiple print jobs or multiple pages, copies, tiles or separations of the same job.

Full vector design application

In HP FlexiPRINT and CUT, you have all the vector design tools required for professional day-to-day signmaking at your fingertips. Increase your creativity and productivity with extremely intuitive layout and design tools, work with Smart Objects or parametric shapes, weld and merge several objects together, create outlines, apply shadows, compose text, braille or barcodes or apply variable data to your design -- all from a single application.

Native 64-bit application

HP FlexiPRINT and CUT can utilize the full processing capabilities of your computer making it easier to work with large files.
