

FlexiSIGN & PRINT

HP Edition

Compatible with All HP printers

All-in-one design-through-production workflow solution

FEATURE SPOTLIGHT

All-in-one print-and-cut workflow

Enjoy the industry's most seamless print-and-cut workflow with stunning accuracy and an easy-to-use interface. Effortlessly design multiple contour cut lines in any vector or bitmap design and create accurate print-and-cut jobs in the fewest steps and from a single application.

Direct-to-vinyl cutting

Produce professional vinyl cut graphics and lettering using colored adhesive-backed vinyl film. HP FlexiSIGN & PRINT fulfills all of your advanced graphic design and production needs for vinyl cutting. It is the recommended solution for signmakers whose work volume requires efficient design and production tools to produce large format prints as well as vinyl cut graphics. HP FlexiSIGN & PRINT supports over 1,000 vinyl cutters - from legacy to the latest vinyl cutters used by most sign shops today.

TOP FEATURES

- Highest level HP certification
- Automatic media synchronization
- Variable Data
- Layers printing
- Fast, native PDF RIP Engine
- Full free-form job tiling
- Cloud Window tools and HP videos
- Manual & automated nesting
- Full margin, bleed and crop marks
- PANTONE® spot color matching
- Print from 3rd party application
- Full color management workflow
- HP WallArt integration
- Support for Opos Xtra

Layers Printing

Printing jobs with multi-layer/white ink has never been easier. FlexiPRINT can generate white ink "on the fly" or from the white layer in the predefined design. Flexi's "sandwich" mode printing supports printing multiple layers, for example, a bottom layer of color, white in the middle and color on top. With the ability to preview the white channel beforehand, users save RIP and print time and avoid wasted materials. Easily control how the ink is printed from the Flexi RIP Production Manager function.

HP Integrated media library tool

Take full advantage of the newest HP Latex printer capabilities thanks to Flexi's close integration with HP's online Media Library. View types of media and auto-synchronize ICC profiles with Flexi to get up and running quickly.

Full vector design application

In HP FlexiSIGN & PRINT, you have all the vector design tools required for professional day-to-day signmaking at your fingertips. Increase your creativity and productivity with extremely intuitive layout and design tools, work with Smart Objects or parametric shapes, weld and merge several objects together, create outlines, apply shadows, compose text, braille or barcodes or apply variable data to your design -- all from a single application.

Native 64-bit application

HP FlexiSIGN & PRINT can utilize the full processing capabilities of your computer making it easier to work with large files.

UPGRADE FROM FLEXISIGN & PRINT HP EDITION TO:

SAi FlexiSIGN & PRINT - Provides additional non-HP drivers for printers and cutters

SAi Flexi Subscription - Provides 3 additional printing queue, additional non-HP drivers for printers and cutters, plus free upgrades

Fastest Print and Cut Workflow

Open File and Create Contour Paths
