FLEXI COMPLETE

FLEXI COMPLETE is the only all-in-one design, print and cut software for sign and print providers. With nearly 3 out of 4 shops using it, Flexi is the industry-standard for sign-specific design tools, RIP software, print-and-cut software, and direct vinyl cutting.

FLEXI DESIGN

FLEXI DESIGN is the leading design software in the sign and print industry. Unlike other design software, Flexi DESIGN was created from the ground up for the sign and print industry which means it includes unique tools that make every aspect of designing, job preparation and production faster.

Create professional designs and artwork with Flexi DESIGN and send jobs to a remote Flexi Production Manager or even another RIP software.

DESIGN

Powerful Vector Design
Quickly convert bitmap or raster images to vector files in just a few clicks even if you're working with difficult or low-quality images. Then use top-notch vector tools to edit points and create perfect toolpaths.

Advanced Text Tools
you get unparalleled control over text design. Choose from the dozens of text editing tools and settings or even use Design Central to control individual points in the text.
What's more, you can save frequently used or intricate text styles to save design time in the future.

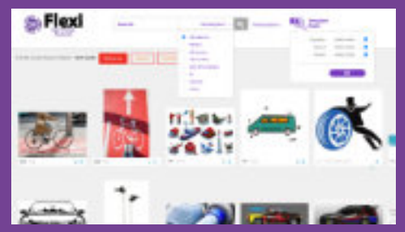

Intuitive Design Central
Whenever you select a tool, Design Central appears, to give you additional options and settings relevant to that specific tool, making artwork design even more user-friendly and helping you work more efficiently.

Convenient Color Management
Unmatched color management. Advanced color algorithms make it easier than ever to select and edit colors in artwork, create duotones, control color modes, and more.
Access an entire library of default or customized swatches within one click for extreme ease of use while designing.

SIGN DESIGN ELEMENTS

The Largest Collection Of Media In The Industry

PRODUCTION

Quality and Speed in Production
With a robust 64-bit RIP the Flexi Production Manager creates the fastest, easiest and most accurate workflow possible. Flexi's straightforward interface makes even traditionally difficult-to-print jobs, such as printing white ink, painless.

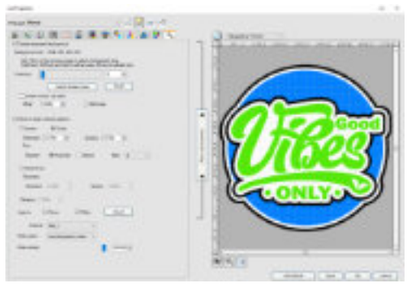

Support Out-Of-The-Box
Thousands of devices are supported right out of the box, including not only major brands but also niche and specialized printers and cutters.
Our library of drivers supports thousands of printers, giving you the freedom to scale up your production and business.

Features Complete
Production Manager lets you manage any type of job with a complete set of tools, enabling you to control all details of your production.
From color management to white ink workflows and finishing options such as folds or grommets - you name it, our software can handle it.

DTF|DTG

Direct To Film And Direct To Garment
Flexi DTF|DTG is a production powerhouse providing both time and ink-saving features that will drive up profits for your business.
Simplify DTF|DTG design and production. Tools are conveniently organized under one tab, so you won't waste time scrolling through menu bars to find what you need.

Versatile White Ink Workflow
Whether you're working with files that have transparent backgrounds or artwork that contains no white at all, Flexi gives you the tools to create transparencies, add masks, and assign white output channels with just a few clicks.

Improved Output Control
Everyone loves beautifully printed fabrics with vivid colors, while also ensuring long-lasting quality and a soft touch.
Flexi DTF|DTG is capable of processing prints to optimize ink usage by applying a specific raster. This feature prevents the creation of stiff ink layers while maintaining high-quality results, giving your prints a softer texture.
